Brussels, 20 april 2012

*Radka Tomašíková worked with us at Okno over the last months.*

*She proved to be an energetic colleague, with fresh ideas, and a good working method. Esp. in creative issues it is hard to find people who can combine a good cooperative spirit and a creative perseverance.*

*Her task was not an easy one: to design a hybrid online/printed/electronic publication. On top of it the contributions were being written while she had to work at it, only a table of contents was available. But she succeeded in working along this nonconventional concept with a very open and even supporting attitude, with very satisfying results. She seemed to tackle all problems without difficulties, even exploiting it in the design's advantage.*

*I hope she learned a lot out of too, and that she can use this experience in the future for other and even stranger projects.*

*If anything similar will come around I would not hesitate a second to ask her again to work with us at it.*

*So all support from Okno for Radka and her future!*

*Actually we invited her back to take part in a conference and festival, where her work will be presented and discussed in front of a wider audience.*

*Which we are looking forward to as well.*

Guy Van Belle

Artistic director OKNO
